

AVENEER EV1

SEWING · EMBROIDERY · QUILTING

Industry First Features and Unrivaled Innovations

✓ Largest Embroidery and Projector Area

A large 14.1" workspace handles everything including large home decor projects. The industry leading 11 5/8" x 18 1/4" embroidery frame is the **largest and most advanced** ever offered by Brother. Project stitches or designs onto an 8"x5" (200 x 127mm) projection area, allowing for precise placement and editing.¹

Picture Play Embroidery Function

Using AI technology, the Picture Play Embroidery Function converts photos or images into thread art and displays it directly on-screen, giving the users the ability to effectively paint with thread for the ultimate work of art.

ISR Intelligent Stitch Regulator

Keeping all stitch lengths even, this feature adjusts the needle timing to match the actual speed of the fabric being fed into the machine. Includes three modes (Continuous, Intermittent, and Basting) and three free motion feet.

A Library of Built-in Designs

Browsing a vast collection of over 877 sewing stitches, 1,858 embroidery designs, 31 fonts, and over 217 Disney character patterns from the large 10.1" capacitive LCD touch screen is easy and comfortable.

✓ Buttonhole Preview

A first in the industry this innovative feature lets users preview the style, vertical or horizontal placement, and spacing of buttonholes through the powerful StitchVision projector!¹

✓ StitchVision Technology

Preview your stitches before you sew! Project a marker line, square, circle, or grid directly onto the fabric in one of 16 colours. This feature brings the reassurance of precision to every project.¹

Edge-to-Edge Quilt Feature

With easy-to-follow instructions and 15 patterns to choose from, this dynamic feature lets users finish their quilt directly on the Aveneer EV1. Even with our 7" x 12" or 10" x 10" magnetic hoops. A great substitute for a long arm!

Voice Guidance Feature

Gently guides users audibly through next steps of a project with a choice of voices in 6 languages.

Mobile Apps

App compatibility extends the creative possibilities of the EV1. With the Artspira Mobile App², access 10 bonus designs for the large hoop or use the drawing tool to create personalised quilt labels. The My Design Snap App² provides the opportunity to digitise any photo in one of 10 filters, all wirelessly between a mobile device and the EV1.
